

Brokercheck Disclosures Tracking

BrokerCheck does not provide an official API; however, we have identified and utilized a backend URL that allows us to retrieve detailed information for both firms and individuals.

To fetch data from BrokerCheck, we require one of the following parameters: **MP_ID**, **Market Participant Name**, **Issue Name**, or **Issue Symbol**. We obtain the **MP_ID** from the FINRA source for the respective firm or individual and will maintain this as our reference universe. For downloading the disclosure PDF, we utilize the **CRD** (*_source_id) in the predefined URL structure

FINRA API endpoint

Using the **FINRA API endpoint**, we extract the market participant ids. We have a couple of endpoints to retrieve the list of MP_IDs. Below is an example of an endpoint along with its response data.

Example Endpoint:

<https://api.finra.org/data/group/OTCMARKET/name/MARKETPARTICIPANTLIST>

Example Output:

[

Brokercheck

Once the **MP_ID** is available from FINRA, we call the BrokerCheck backend url. This returns comprehensive details for the corresponding firm or individual. Within this response, key fields such as **CRD** (*_source_id) are particularly important, as they are used to retrieve the disclosure PDF.
